OPTICAL ADD/DROP MUX FOR
LAMBDA DROP

PLEXSTAR OADM

Product Description:

Plexstar[®] OADM family of products selectively adds and removes wavelengths while passing on others rather than combining or separating all wavelengths.

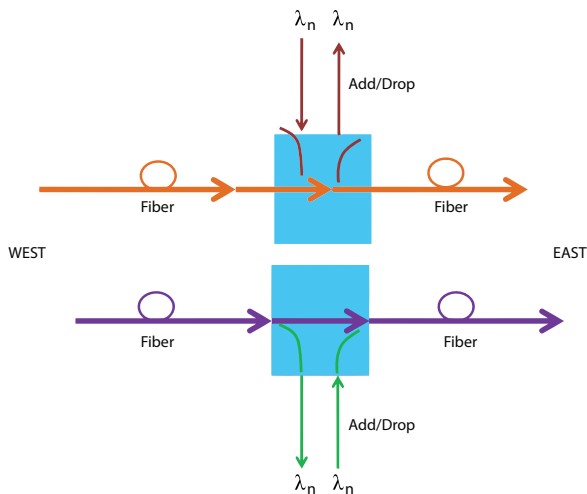

Note: OADMs are similar in many respects to SDH ADMs, except that only optical wavelengths are added and dropped, and no conversion of the signal from optical to electrical takes place.

Application/Use:

- Optical add/drop multiplexer and/or
- Terminal multiplexer/de-multiplexer
